

Fast Ethernet and PoE+ over Coax with up to 6,000ft (1,830m) Reach

#### EC-Base Extender Solution

The NVT Phybridge EC-Base Extender Solution is designed to supercharge the downlink ports of a standard Ethernet switch, delivering 10/100Mbps symmetrical (full duplex) and PoE over Coax infrastructure with distances up to 6,000ft (1,830m). **That's 18X the reach of standard Ethernet switches,** thus removing the costs and disruptions associated with multiple IDF closet requirements.

With the EC-Base Extender Solution, IP IoT devices can be connected to the existing Coax cabling infrastructure, delivering optimal performance while saving cost, time, and environmental e-waste. Furthermore, the cost savings realized by using the EC Extender Solution can enable system designers to transfer budget and resources towards higher-quality applications and IEEE-compliant IoT devices, including IP-enabled phones, cameras, access control, speakers, and even facilities lighting.

# Extend the reach of standard PoE switches with the EC Extender Solution

**EC-Base Paired with the EC-Link** Enable 1 IP endpoint from a single long run Coax cable with up to 30W of power

**\*EC-Base Paired with the EC-Link+** Enable 1 IP endpoint from a single long run Coax cable with up to 50W of power

**\*EC-Base Paired with the EC4** Enable 4 IP endpoints from a single long run Coax cable with up to 50W of power per port

#### **NV-ECLK-BSE**

\*Pairing options available in conveniently packaged EC-Extender Kits

## NVT PHYBRIDGE EC-Base Extender DATASHEET

#### AT A GLANCE

#### (NV-ECLK-BSE)

- Base unit for 1-port long reach PoE Extender
- Negotiates with PoE switch
- When paired with EC-Link+ (50W), EC4 (30W) or EC-Link (30W) Adapters, delivers PoE over coax with up to 6,000ft (1,830m) reach
- Can be locally powered
- EN 50121-4 Standard for Railway/ Subway environments

#### **EC-EXTENDER KITS**

Each EC Extender Kit is conveniently packaged and includes an EC-Link+ or EC4 Adapter, an EC-Base Extender, and an external power supply.

#### **1-Port EC Extender Kit** (NV-ECLK-PLS-XKIT)

- Extend reach of standard PoE switch
- Single port coax extender solution enabling 1 endpoint from a single long run Coax cable
- 10/100Mbps symmetrical (full duplex) and PoE+ (up to 30W) with up to 6,000ft (1,830m) reach
- Up to 50W of power available for the endpoint
- · Adapters can be locally powered
- Includes: EC-Base Extender, EC-Link+ Adapter, and 60W, 55V external power supply

# **4-Port EC Extender Kit** (NV-EC-04-XKIT)

- Extend reach of standard PoE switch
- Single port coax extender solution enabling 4 IP endpoints from a single long run Coax cable
- 10/100Mbps symmetrical (full duplex) and PoE+ (up to 30W) with up to 3,000ft (915m) reach
- Delivers up to 30W of power per downlink port
- Adapters can be locally powered
- Includes: EC-Base Extender, EC4 Adapter, and 110W, 55V external power supply

## EC-Base Technical Specifications

100Mbit 10Mbit

Power & Distances are based on the following cable specs:

| Cable Spec | Core Type    | AWG    | Diameter | Wire Resistance (m) | Wire Resistance (ft) |
|------------|--------------|--------|----------|---------------------|----------------------|
| RG-11      | Solid Copper | 14 AWG | 1.63 mm  | 1.21 Ω/100m         | 0.37 Ω/100ft         |
| RG-6       | Solid Copper | 18 AWG | 1.01 mm  | 3.60 Ω/100m         | 1.10 Ω/100ft         |
| RG-59U     | Solid Copper | 22 AWG | 0.64 mm  | 7.87 Ω/100m         | 2.40 Ω/100ft         |

#### **CLEER FAMILY ADAPTER OPTIONS**

**EC Adapter Options** There are three media converter options available to pair with the CLEER family of switches to extend PoE over Coax. The EC-Link and EC Link+ are single endpoint solutions and the EC4 enables 4 IP endpoints from a single long run Coax cable.

**EC-Link** 

|        | EC-Link  | EC-Link+   | EC4  |
|--------|--|--|--|
| Power  | <ul> <li>Maximum 30W, delivered on<br/>2-pairs (spare pairs)</li> <li>Local power option</li> <li>Does not negotiate power<br/>requirements with IP device</li> <li>Device must be IEEE 802.3<br/>af/at compliant</li> </ul> | <ul> <li>Maximum 50W (If locally<br/>powered and 30W if power<br/>provided from switch)<br/>delivered on 4 pairs</li> <li>Local power option</li> <li>Adapter is IEEE 802.3af/at<br/>compliant and will negotiate<br/>power requirements with IP<br/>device</li> </ul> | <ul> <li>Maximum 50W, delivered on<br/>4 pairs (local power required)</li> <li>Local power option to<br/>support greater power<br/>delivery to IP devices</li> <li>Does not negotiate power<br/>requirements with IP device</li> <li>Devices must be IEEE 802.3<br/>af/at compliant</li> </ul> |
